Growth & Development

At Nyalkaran Overseas, growth is not just a goal – it's our constant journey. From our humble beginnings to becoming a trusted global exporter, we've built our foundation on quality, trust, and innovation.

Over the years, we have expanded our product range from agricultural commodities to natural cosmetics, industrial goods, and ceramic products – each representing our commitment to excellence. Our growth is powered by continuous market research, advanced sourcing methods, and strong relationships with suppliers and clients across the world.

We believe true development comes from sustainability and customer satisfaction. By maintaining high standards, adopting modern business practices, and exploring new markets, we continue to grow while contributing to the success of our global partners.

Why Choose Us?

01

All products meet international quality benchmarks.

From agriculture to industrial products, we cover multiple sectors.

02

03

Timely delivery and excellent customer service.

Proven experience in exporting to countries worldwide.

04

Agricultural Commodities

We supply premium-grade agricultural products sourced from trusted farmers and suppliers:

- Groundnut (Peanuts) – Fresh, high-quality, and nutrient-rich.
- Sesame – Clean and oil-rich seeds for culinary and industrial use.
- Cumin – Aromatic seeds perfect for spice blends and seasoning.
- Fennel – Sweet and fragrant seeds for food and health purposes.
- Fox Nut (Makhana) – Healthy, protein-rich snack options.

Multani Mitti

Indulge in the time-tested beauty ritual of Multani Mitti, a gift from nature renowned for its deep-cleansing and purifying properties. Sourced from mineral-rich clay, also known as Fuller's Earth, this exquisite powder acts like a magnet, drawing out impurities, excess oil, and toxins to reveal a fresher, brighter complexion. Rich in minerals like magnesium and calcium, our finely-sifted Multani Mitti gently exfoliates dead skin cells, helping to minimize pores, reduce acne, and fade blemishes for a smooth, even-toned finish. Experience the cooling, soothing sensation as this versatile clay calms inflammation and leaves your skin feeling revitalized and radiant, embodying a tradition of natural, flawless beauty passed down through generations.

Roller Bearings

Engineered for superior performance under the most demanding conditions, our roller bearings provide exceptional strength and durability for a vast range of industrial applications. Unlike ball bearings, the line contact formed by the rollers allows them to accommodate much heavier radial loads, ensuring reliable operation in heavy-duty machinery, gearboxes, and wind turbines. Our comprehensive range includes various types to suit specific needs, from cylindrical roller bearings for high-speed, high-radial-load applications to spherical roller bearings designed to handle heavy loads and accommodate misalignment.

Polypropylene Rope

Constructed from durable and versatile polypropylene, our ropes are designed for a wide range of applications, offering an exceptional balance of strength and flexibility. Thanks to its water-resistant and buoyant properties, PP rope is a preferred choice for marine environments, including fishing nets, mooring lines, and water sports. It also boasts excellent resistance to rot, mildew, oils, and most chemicals, making it a reliable solution for industrial and agricultural needs.
